To hear the unheard,
To know the invisible,

Voices

Voices can be heard in many diverse ways, from different parts of the brain.

If from the left side, the voices can be mean, derogatory, shouting,. Very disrupting.

If from the right side, they can be soft, kind, singing.
Lovely company to be sure.

The more one is in the left, the stronger and meaner the content.

The more one is in the right, the softer and sweeter the content.

Voices as with vision are caused.
Since they are caused, they can be uncaused with time and practice.

For those who would wish to have the company of voices, it is possible to achieve this state/gift.

What is caused can be uncaused.
What is uncaused can cause.

Visions

Visions are caused by being in the left or right side of the brain.

Coming from the left side, they are seen in the black.

Some symbols are universal. Some personal

Walk the Maze

We have an over a thousand coloured-stone maze, set in a gem of green grass with a willow tree in the center, in which is nestled an angel in waiting.

Walking a maze is very rewarding, because we have a portion of our brain which is like a gyroscope. When you turn around in the maze, your gyroscope is spun on its axis, releasing stored up negative energy, thus cleansing.

Once you have the negative energy removed, it is replaced by the positive.

One meditates on an aspect of life that is challenging as you walk. When one sits in the center enjoying the garden, one becomes at peace.

On the outward journey, one is blessed with assurance, and Constructive Inspirations on how to deal with your ordeals, aims and aspirations.

You are welcomed to visit in the evening when the sun is low in the sky, casting her magic spell over the world.

Peace is the goal.
